

## Busbi Cable Lock Accessory. User Instructions

**Note:** This cable lock is intended for use in preventing unauthorised use of the Busbi Wasp scooter, and not specifically as an anti-theft device.

### Setting the desired combination:

① Ensure the factory setting '000' is centred in line with the interval marks on the casing.

② Insert an implement such as an instrument screwdriver into the hole located on the edge of the lock casing.

③ Keeping upward pressure on the screwdriver, turn the thumbwheels to the desired combination centred in line with the interval marks on the casing.

④ Release and remove the screwdriver. Scramble the thumbwheels and then test the opening and closing of the lock using the set combination.
